

Milgram Experiment

- Aim: To test people's responsiveness/obedience to authority – how far could a human go to inflict pain?
- Nature of responsibility
- Prediction: 0.1% of all participants will go all the way till 450V.
- Actual: Over 50% of all participants went all the way till 450V.

Philip Zimbardo's Stanford Prison Experiment

- Lucifer effect
- What will cause transformation of human character?
 - Dispositional: Inside of individuals – The Bad Apple
 - Situational: External – The Bad Barrel
 - Systemic: Broad influences – The Bad Barrel-makers (political, economic, legal power, etc.)
- Human minds (Hero or Villain):
 - Kind or Cruel
 - Caring or Indifferent
 - Creative or Destructive
