<ul style="list-style-type: none"> <li>12 questions to choose from</li> <li>Approach &gt; Show understanding of demand of questions / nature of questions</li> <li>Common features of essay questions (Some questions may have multiple features)</li> </ul>	
Absolute questions - 'always', 'ever', 'only'	Force you to question the particular contexts for which the statement is true
Significance questions - 'to what extent', 'how important', 'simply', 'value', 'mere', 'just', 'rarely', 'not actually'	Evaluate / Measure the significance / insignificance based on a standard / criteria set for measuring significance
Comparison questions - '...er than', '...est', 'the main', 'instead of', 'rather than', 'at the expense of'	Compare the factors consistently and come to your own conclusion about the factors (why one is better than the other / why one is the best compared to the rest, etc.)
Context of time questions - 'still', 'no longer', 'anymore'	Consider and compare past and present (or future) context, and discuss the relevance of the issue / subject matter to the context
Excess questions - 'too much', 'too little', 'not enough', 'lack'	Evaluate the issue based on your knowledge of the common standard / norm / expectation and justify if the line has indeed been crossed (eg. 'We are too pragmatic.' How true is this to your society? > We are pragmatic, but we have not cross the line.)
Explicit assumption questions - consist of two or more parts	Ascertain the explicit assumption, characterise the assumption, and focus your argument on the implicit assumption made (eg. 'Advertisements <b>are often entertaining</b> , but they <b>rarely affect consumers' choice</b> . Do you agree?' > Should not ignore either part & Focus on the 2nd part)
